### FUSE CONSIDERATION

This power module is not internally fused. An input line fuse must always be used.

This encapsulated power module can be used in a wide variety of applications, ranging from simple stand-alone operation to an integrated part of sophisticated power architecture.

To maximum flexibility, internal fusing is not included; however, to achieve maximum safety and system protection, always use an input line fuse. The input line fuse suggest as below :

Model	Fuse Rating (A)	Fuse Type
WAF300-48S□□W	25	Fast-Acting
WAF300-110S□□W	12	Fast-Acting

The table based on the information provided in this data sheet on inrush energy and maximum DC input current at low Vin.

11	LS (option)	20-28 AWG
12	- Sense	20-28 AWG

\* The current rating of the terminal block is 15 amps/pole.

\* Using 2 poles at the same time when operating is recommended if the total current are more than 15 amps or choose optional 2-way splitter. (Please refer to the diagram below)

\* Input voltage vs. Input terminal, refer to the table below.

Output power	Input voltage	Input terminal
300W; Full load	≥ 23V	1 pole
	< 23V	2 poles
400W; C.C. mode	≤ 32V	1 pole
	< 32V	2 poles

3. The screw locked torque: MAX 14kgf-cm/1.37N.m

### DIN RAIL TYPE

## 2-WAY SPLITTER (OPTIONAL ACCESSORY)

The 2-way splitter can be used for transforming a thick wire into 2 thin wires to the terminal block.  
The 2-way splitter P/N:5J-C0045-F.

## THERMAL CONSIDERATIONS

The power module operates in a variety of thermal environments. However, sufficient cooling should be provided to help ensure reliable operation of the unit. Heat is removed by conduction, convection, and radiation to the surrounding Environment. Proper cooling can be verified by measuring the point as the figure below. The temperature at this location should not exceed "Maximum case temperature". When Operating, adequate cooling must be provided to maintain the test point temperature at or below "Maximum case temperature". You can limit this Temperature to a lower value for extremely high reliability.
